CRRA Members Weekly Update

Asst. General Manager Community Letter

Happy Friday CRR!

We hope everyone has had a great week. As you know, the storm and significant rainfall made a mess of the community. Crews have been busy since then getting things cleaned up and clearing downed trees.

That's all we have for business this week. I hope everyone is looking forward to a long holiday weekend. This is the last weekend of operation for Riverside Pool for the season, so make sure you take advantage. I heard there may be a little something special happening this weekend, but you won't know if you don't go!

Have a wonderful extended weekend everyone, and we'll be back next week.

Best Regards,

Racey Cave
Asst. General Manager

Labor Day 2021

As a reminder, the POA office will be closed Monday, September 6th, for the observance of Labor Day.

We will be open the following day, Tuesday the 7th, at 9:00am.

Volunteers Needed!

We are looking for residents who want to volunteer to assist at the POA. If you are a resident in good standing and are interested, email reginavalladares@mycrra.com.

Serious applicants please call 706-640-4010 or email your resume to michelekellogg@mycrra.com.

A Message From Your Environmental Conservation Committee

Septic System Care

The average household septic system should be inspected at least every 3 years by a septic service professional. Household septic tanks are typically pumped every 3-5 years.

Four major factors influence the frequency of pumping:
Household size; total wastewater generated; volume of solids in wastewater & septic tank size.

- When you call a septic service provider, he/she will inspect for leaks examine the scum & sludge layers in your septic tank.
- Keep maintenance records on work performed on your septic system.
- Your septic tank includes a T-shaped outlet which prevents sludge and scum from leaving the tank and traveling to the drain field area. If the bottom of the scum layer is within six inches of the bottom of the outlet, or if the top of the sludge layer is within 12 inches of the outlet, your tank needs to be pumped.
- To keep track of when to pump out your tank, write down the sludge and scum levels found by the septic professional.

The service provider should note repairs completed & the tank condition in your system's service report. If other repairs are recommended, hire a repair person soon.

The National Onsite Wastewater Recycling Association (NOWRA) has a septic locator that makes it easy to find service professionals in your area. Source: <https://www.epa.gov>

Announcements

- A tentative Finance Committee meeting is scheduled for Wednesday, September 8th @ 3:00PM. To attend, simply click the following link once the meeting has begun:

<https://zoom.us/j/83828371035>

- If you're new and wondering how you get one of those nice looking 911 address signs, you can find the order form by clicking [here](#).
- You can log in, view documents, and make dues payments by visiting:

- Do not speed! Make sure to follow the speed limit. This is not only to avoid accidents, but also reduces the amount of dust for your neighbors.
- Be aware of any suspicious activity or prowlers! Always contact the Sheriff's office and report to Management.

Emergency Alert & Support Options

In case of emergency dial 911
